Professional Summary

Full Stack Developer with 1.9+ years of experience building scalable web and mobile applications using Java, Spring Boot, React.js, Next.js, TypeScript, React Native, and MySQL. Currently working as a Team Lead at Qloax managing a team of 6-8 interns while handling project delivery, frontend architecture, mentoring, and development workflows.

Experienced in Microservices, RESTful APIs, JWT Authentication, CI/CD Pipeline, State Management, Responsive Design, and Performance Optimization. Passionate about scalable systems, clean architecture, and production-ready applications.

Key Technologies

Java • Spring Boot • React.js • Next.js • TypeScript • React Native • REST APIs • Microservices • JWT Authentication • CI/CD Pipeline • MySQL • MongoDB • Supabase • Tailwind CSS • Performance Optimization

Technical Skills

Languages: Java, TypeScript, JavaScript

Frontend: React.js, Next.js, React Native, Tailwind CSS, Angular (Basics)

Backend: Spring Boot, Spring Security, Hibernate (JPA), RESTful APIs, Microservices

Mobile Development: React Native, Expo, Android APK Build, Mobile UI Optimization

Databases: MySQL, PostgreSQL, MongoDB, Supabase

Tools: Git, GitHub, Postman, Jira, VS Code, IntelliJ IDEA, Eclipse

Concepts: JWT Authentication, MVC, OOPs, Agile, CI/CD Pipeline, State Management, Responsive Design, Performance Optimization

Professional Experience

QLOAX

Team Lead & Full Stack Developer

Oct 2025 – Present

Pune, India

- Leading a team of 6-8 interns handling mentoring, task delegation, project delivery, and code reviews
- Managing frontend architecture and full-stack development using Next.js, Spring Boot, and scalable development practices
- Developed and deployed SaaS and corporate platforms achieving 95+ Lighthouse scores across SEO, accessibility, and performance
- Built reusable UI component libraries reducing frontend development effort by 40%
- Integrated RESTful APIs, JWT Authentication, scalable backend systems, and CI/CD deployment pipelines
- Improved application performance and loading speed using optimized rendering and frontend state management
- Developed responsive mobile application features and optimized APK performance for smooth navigation
- Implemented GSAP-based animations and interactive UI improving user engagement and UX quality

ValueDX

Full Stack Developer Intern

Jun 2025 – Sep 2025

Pune, India

- Built scalable LMS platform using Spring Boot, React.js, MySQL, and JWT-based authentication
- Optimized MySQL queries reducing backend response latency by 35%
- Designed modular JPA models and RESTful APIs for instructors, assessments, and admin workflows
- Applied clean architecture principles improving maintainability and scalability
- Worked in Agile environments using Git-based version control and collaborative workflows
- Implemented secure role-based access control and optimized authentication workflows using Spring Security and JWT
- Collaborated with frontend and backend teams to integrate scalable APIs and improve overall system performance
- Participated in debugging, testing, and deployment processes ensuring stable and production-ready application releases

Projects

Enterprise School ERP Platform | Next.js, MERN, Supabase

Live: <https://school-erp-fe.onrender.com/login>

- Built full-scale ERP platform covering admissions, attendance, fees, timetable, and student management modules
- Implemented role-based authentication, responsive dashboards, scalable state management, and optimized frontend performance
- Integrated Supabase authentication, secure storage, backend services, and REST APIs for scalable operations
- GitHub: <https://github.com/yashqloax-ux/ERP>

Qloax SaaS Platform | Next.js, GSAP, TypeScript

Live: <https://www.qloax.com/>

- Developed reusable UI component library and scalable frontend architecture for SaaS applications
- Built responsive dashboards, reusable layouts, animations, and optimized user interactions
- Implemented performance optimization improving overall user experience across devices

VRBS Corporate Website | Next.js, TypeScript

Live: <https://vr-bs.com/>

- Developed SEO-optimized corporate website achieving 95+ Lighthouse performance scores
- Implemented responsive UI and optimized rendering for faster loading speed and accessibility

Full Stack Yoga Booking Platform | React, Spring Boot, MySQL

GitHub Project

- Built booking, testimonial, and inquiry management system using Spring Boot backend APIs
- Integrated secure REST APIs and responsive frontend design improving user interaction

Leadership & Collaboration

Team Management • Mentoring Interns • Task Delegation • Code Review • Agile Sprint Planning • Project Ownership • Client Communication

Education

RMD Sinhgad School of Engineering (CGPA: 7.77)

Bachelor of Engineering in Computer Engineering – First Class with Distinction

2024
Pune, India

Modern College of Arts, Science and Commerce (61.38%)

12th PCM – First Class with Distinction

2020
Pune, India

Certifications

Full Stack Java Developer – Advanto Software
Software Engineering Job Simulation – Skyscanner & JPMorgan Chase
Data Analytics Job Simulation – Deloitte Australia
Frontend Developer (React) Certificate
Angular and NodeJS – The MEAN Stack Certificate
